Make it Reasoning Activity Cards Set 1 - Foundation Stage and KS1

These activity cards are designed to develop learners reasoning skills. The aim of the activities is to encourage thinking, mathematical discussion and reasoning. Regular use of the activities will support learners to explain their thinking and prove their ideas. The activities can be used for whole class discussions, group work or individual challenges and can be part of a lesson, homework challenges, or a standalone activity such as settling children down after play.

These cards focus on time and develop the following reasoning strategies:

I know... so I know...

What's the same? What's different?

Always, sometimes or never

Odd one out

Spot the mistake

Do I fit?

There are also activity cards available for learners in Key Stage 2, making these activities ideal for a whole school focus on reasoning. Look out for Cully Education Top 10 Tips for ideas about how to successfully embed these and other useful reasoning activities on my [twitter page](#)

I know Dai got up before Tom.

I know Tom got up before

Sian.

So...

I know that Sian got up ... Dai.

I know Art is after Maths.

I know Maths is after Music.

So...

I know that Art is ... Music.

I know Siw ate after Tom.

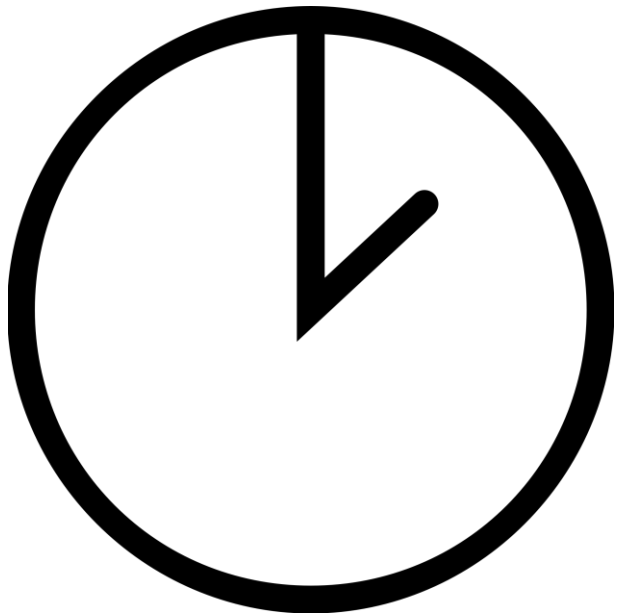

I know Siw ate before Dai.

So...

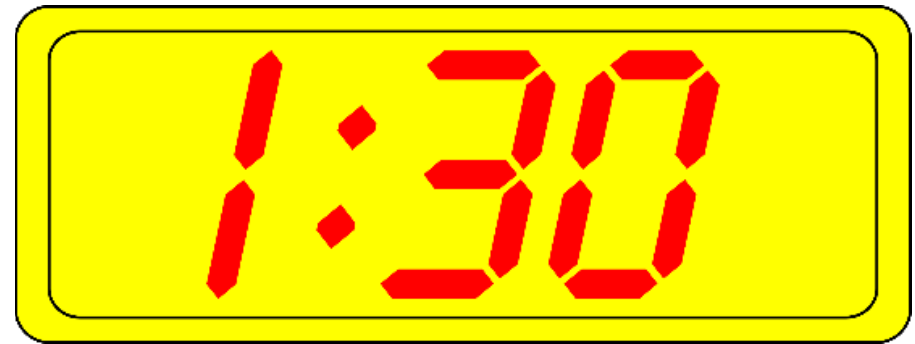

I know that Dai ate ... Tom.

What's the same? What's different?

What's the same? What's different?

What's the same? What's different?

Always, Sometimes or Never

There are 12
divisions on a
clock
